Introduction
By the end of this tutorial you will be able to:

- Define the term infographic.
- Understand different types of infographics.
- Create an effective infographic using a digital tool.

What is an Infographic?
Information + Graphics = Infographics.

“A visual representation of information or data, for example as a chart or diagram. ‘a good infographic is worth a thousand words’”. (Oxford Dictionaries, n.d.)

The human brain is very well adapted to processing visual information.

This makes data visualizations and infographics very powerful tools for communicating lots of information in an easily digestible format.

You don’t need to be a graphic designer or an artist to make effective infographics - there are lots of free online tools available to help you.

Infographic Best Practice
The mark of a good infographic is its effectiveness in communicating a message concisely and quickly.

David McCandless (2010) – data journalist and information designer - describes this as “knowledge compression”.

- See his website: Information is beautiful.
- Watch his TED talk: The beauty of data visualization.
The Anatomy of an Infographic

Top 10 countries importing UK manufactured goods by Office for National Statistics used under CC BY 2.0

- Focused title with a key message that narrates a story worth telling.
- Simple but visually appealing design; brightly-coloured circles help convey the key message.
- Accurate and well-researched data.
- Produced by a reputable source.

Types of Infographics

Chart: to present statistics, facts and figures

Household Taxes 2012/13

TAXES PAID BY THE POOREST AND RICHEST 20% OF HOUSEHOLDS
£ (per year) - figures may not sum due to rounding

Households are grouped into quarters (or fifths) based on their equivalised disposable income. Equivalisation accounts for the fact that larger households are likely to need a higher income to achieve the same standard of living as smaller households. The richest 20% of households are those with the highest equivalised disposable income. Similarly, the poorest 20% of households have the lowest equivalised disposable income.

DIRECT TAXES

Income Tax 14,559
Capital Gains Tax 713
Income Tax 363
Employee's NI contributions 180
TOTAL TAXES 20,322

INDIRECT TAXES

VAT 1,397
Taxes on goods and services 2,602
TOTAL TAXES 4,743

INDIRECT TAXES*

VAT 356
Stamp Duty 262
Vehicle Excise Duty 107
Tobacco Duty 29
TOTAL TAXES 9,140

*Indirect taxes

The amount of indirect tax a household pays is determined by their expenditure rather than their income. Indirect taxes can be divided into three key types: taxes on goods and services and intermediate taxes. Intermediate taxes are taxes paid by companies on inputs into the production of goods and services. It is assumed that companies pass on the value of these taxes onto the final consumer.

Each year 1.7 million deaths of children under 5 are linked to the environment.

- **570,000** deaths from Respiratory infections, including pneumonia
- **360,000** deaths from Diarrhoea
- **270,000** deaths from Neonatal conditions, including prematurity
- **200,000** deaths from Unintentional injuries, such as burns, drowning
- **200,000** deaths from Malaria

Reducing environmental risks could prevent a quarter of these deaths.

Girls who stay in EDUCATION and complete secondary school are:

More Likely to
- Marry later 💃 $
- Have higher incomes
- Have fewer children
- Have healthier children
- Have children that go to school
- Take part in decision-making 💗
- Escape poverty 🌟

Less Likely to
- Contract HIV & AIDS
- Contract Malaria
- Undergo FGM
- Die in pregnancy 🤧
- Die in childbirth
- Have children who die in infancy 🙆‍♀️

The Importance of Self-Care:
WHY YOU SHOULD PAMPER YOURSELF

Benefits of relaxing:
- Reduce stress
- Promote the production of your body’s “feel-good” hormones
- Improve cellular function

Low-Cost Self-Care Ideas:

- Search YouTube for a relaxing yoga or meditation routine.
- Write a list of things that make you happy.
- Write down what’s stressing you and, if you want, rip up the paper.
- Find a relaxing hobby.
- Listen to relaxing music with your eyes closed.
- Get a massage from a friend or partner.
- Go for a walk.
- Make a homemade edible facemask.
- Play with a pet for 15 minutes.
- Take a break, alone or with friends.
- Take a bubble bath.
- Pick up or make your favorite treat and savor it.
- Spend some extra time getting ready in the morning.
- Find free local events at places like museums, botanical gardens, and zoos.

Good self-care can prevent, delay, or reduce physical and mental health problems

Advantages of Wind Power

Clean Energy

Obtaining energy from the wind emits zero emissions into the atmosphere, providing a clean alternative to fossil fuels, which contribute significantly to dangerously high levels of atmospheric CO2.

Less Space is Needed

Wind turbines take up much less space than what is required for a single power station, and the surrounding land can continue to be used for other purposes including agriculture.

Renewable Energy

Unlike fossil fuels, the wind will not run out, and can provide the planet with a limitless supply of "free" power.

Generate Energy in Remote Locations

In remote mountainous or countryside regions, utilising wind power can provide a much cheaper and convenient source of energy.

Do the advantages outweigh the disadvantages?

Disadvantages of Wind Power

Unreliability

The main issue concerned with power from the wind, is that of its unreliability. Wind strength cannot be controlled and in some areas it is just not a viable source of power.

Lower Electricity Output

Wind power generates significantly less electricity than its fossil fuel equivalent, meaning more turbines are required to generate the same amount of power. Wind turbines are also highly inefficient in terms of output capacity.

Expensive Construction Process

Wind turbines are costly to build with one turbine costing up to $1 million per MW of nameplate capacity installed.

Costly to surrounding wildlife

With demand for renewable and cleaner energy sources growing it is likely that the need for land for windfarms will increase, which will potentially damage a high percentage of local wildlife in the process. It is also estimated that each wind turbine kills over 4 birds a year.

Noise Pollution

The noise produced from a singular wind turbine is similar to that of a small jet engine and can be a cause of major concern for those living near a windfarm.

The US accounts for 32% of new installed wind capacity in 2008

Wind Power provides 1.5% of total electricity consumed

In-shore farms could produce up to 40x the world's total electricity

ENVIRONMENTAL IMPACTS ON HEALTH

WHAT IS THE BIG PICTURE?

FACT: 23%

of all global deaths are linked to the environment.
That’s roughly 12.6 million deaths a year.

WHERE IS IT HAPPENING?

- 3.8 million in South-East Asia Region
- 3.5 million in Western Pacific Region
- 2.2 million in Africa Region
- 1.4 million in European Region
- 854,000 in Eastern Mediterranean Region
- 847,000 in the Region of the Americas

Creating Infographics: The Process

1. Choose your topic and ensure it is relevant and engaging.
2. Define your audience. This will dictate your content depending on their prior knowledge of the topic.
3. Define your aims and objectives to give the infographic purpose and structure.
4. Research your topic and find images to effectively illustrate your key points.
5. Organise your information, references and data in a clear and visually appealing design.
6. Choose a digital tool and get creating.

Digital Tools for Creating Infographics

Visme
- Standard version is free
- Create interactive and animated infographics
- Embed data widgets, voice, music and video
- Download the infographic for offline use
- Add others as collaborators
- Create up to five projects at a time

Getting Started with Visme Infographics (YouTube Video)

Visme website

Piktochart
- Standard version is free
- Create infographics with animated charts and graphs
- Embed videos
- Download your infographics
- Create unlimited projects
